Given this 24th day of January 2025 at the Polytechnic University of the Philippines
via Microsoft Teams Conference.

MS. LOVELY JHAV A. ORISOSTO
Project Head

ASSOC. PROF. ANN-LYN D VINUYA, LPT, MEM
Events Management Adviser

REFLECTION

Attending in this webinar, i was impressed by the invaluable information provided about the essential need for ethicality in AI design. The speakers underscored the necessity to keep technological innovation balanced with use, especially issues of bias, transparency, and privacy. I was particularly impressed by exchange of ideas on how AI systems can end up bringing biases in societies when they are trained on defective data. I now better realize my future role as a critical thinker and stuff. Even though I'm not very technical, I feel like I can evaluate AI tools in the workplace better now. This webinar has provided me with an ethical decision-making values that I'm gonna use throughout my academic and professional life to ensure that human needs and values are kept at the core of technological innovation, which is really important these days.
